

DP TECHNOLOGY/ESPRIT COMPANY INTRODUCTION LETTER

DP Technology is a leading developer and supplier of computer-aided manufacturing (CAM) software for a full range of machine tool applications. ESPRIT, DP Technology's flagship product, is a powerful, high-performance, full-spectrum programming system for milling, turning, wire EDM, and multitasking machine tools. ESPRIT embodies DP Technology's passion for excellence and its vision of technology's potential.

DP Technology reinforces its commitment to technical excellence by dedicating nearly 20% of its annual revenues to ongoing research and product development. This long-term focus has produced powerful technology innovations, putting ESPRIT in an industry-leading position since its market launch in 1985. DP Technology currently has two patents pending on the technology embodied within ESPRIT.

DP Technology maintains its worldwide headquarters in Camarillo, California and product development teams in California and Florence, Italy. Sales and support operations are located in Europe, Asia, and North and South America.

Starting from April 2006, DP Technology proudly announces the grand opening of the first official **ESPRIT CAM CENTER** in Poland.

Our official Partner will provide the full range of ESPRIT products as well as high quality services associated to support of a wide distribution network in Poland. Please feel free to contact our new ESPRIT CAM CENTER.

Sincerely,

Philippe Albert

Director of Sales for Europe
